## MORE SCAM ATTEMPTS

According to the information obtained by the police, **scam attempts against the elderly** have appeared again, including in the Rimavská Sobota - Rimaszombat district. The scam is based on the classic phone contact where the caller says things like, **"Your daughter was in a car accident where she hit someone. Prepare gold and a thousand euros, for which a blonde policewoman will come and just throw the money out the window along with the gold."** Or: **"Your son was in a car accident and his jaw is broken, so he can't speak. You must prepare ten thousand euros for the lawyer. If you don't have that much money, prepare gold."** The police ask the public to contact the elderly and those who live alone in their surroundings, and warn them of this current danger, and to **never give out personal information or information about how much money or other valuables they have at home or in the bank**, and if they receive a suspicious call, hang up the phone immediately. Only by repeatedly informing citizens, especially the elderly, can we prevent the aforementioned crime.
